Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In order for more than one species to be examined, the appropriate additional examination fees must be paid. The species are as follows:

Fig. 2 (embodiment 1) and Fig. 3 (embodiment 2).

2. The claims are deemed to correspond to the species listed above in the following manner:

Fig. 2 – claims 1, 3, 4, 5, 6, 7, and 8.

Fig. 3 – claim 2.

The following claim(s) are generic: none.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Fig. 2 (embodiment 1) and Fig. 3 (embodiment 2) are directed to an audio signal controller for inputting and outputting a two-channel audio signal, but each fig. has a different special technical feature not shared by the remaining figs. Fig. 2 is directed to an audio signal controller, which has the special feature of a band-pass off state having a flat frequency characteristic between a bass range and a treble range and a band-pass off state having a flat frequency characteristic between a bass range and a treble range not shared by any of the remaining figs. Fig. 3 is directed to an audio signal controller for inputting and outputting a two-channel audio signal, wherein a bass-pass on state in which the band-pass circuit provide outputs at a low gain and a band-pass

off state that provide speakers with an output characteristic that the output midrange has a 5-dB higher gain.

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Fig. 2 (embodiment 1) and Fig. 3 (embodiment 2)

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
